```sql
SELECT * FROM Enrollment
WHERE enrollment_id = 3;

-- Begin a transaction
START TRANSACTION;

-- Temporarily change Mary's coursework score
UPDATE Enrollment
SET coursework_score = 20
WHERE enrollment_id = 3;

-- Check the temporary change
SELECT * FROM Enrollment
WHERE enrollment_id = 3;

-- Undo the change
ROLLBACK;

-- Confirm the original score is restored
SELECT * FROM Enrollment
WHERE enrollment_id = 3;
```

```sql
USE UniversityManagementDB;

-- Check the original record
SELECT * FROM Enrollment
WHERE enrollment_id = 3;

-- Begin transaction
START TRANSACTION;

-- Update Mary's coursework score
UPDATE Enrollment
SET coursework_score = 27
WHERE enrollment_id = 3;

-- Make the change permanent
COMMIT;

-- Verify the committed change
SELECT * FROM Enrollment
WHERE enrollment_id = 3;
```
